## The Astronomical Society of the Palm Beaches

We are a group of individuals dedicated to the pursuit of observational astronomy and to the education of the general public on astronomy and its related issues such as "light pollution".

Our monthly meetings include informative presentations given on varied topics. Past presentations have included: astrophotography, the constellations, deep-sky astronomy, eclipses, telescope making and use, the history and mythology of astronomy, and many others!

At our observing sessions, members bring and use a wide variety of equipment...from binoculars and small refractors to 20-inch reflectors.

Our meetings and observing sessions are open to the public and free of charge. Knowledge and experience levels of our membership range from complete novices to individuals who have enjoyed astronomy all their lives, including educators in the field. Our membership consists of men and women of all ages and walks of life.

*All are welcome to participate!*

Members of ASPB receive our monthly newsletter Stars & Scopes. They also receive substantial discounts on subscriptions to Sky & Telescope and Astronomy magazines.

### Monthly Meetings:

When: First Wednesday each month

Time: 7:30 pm

Where: South Florida Science  
Museum at Dreher Park  
West Palm Beach, Florida

### Public Observing Sessions:

Jonathan Dickinson State Park  
Area 51 (Big Cypress Preserve)  
Summit Library (Seasonal)  
Jupiter Library (Seasonal)
